

West Outer Ring Road

► Project Description

The West Outer Ring Road (JLLB) in Surabaya is designed to improve accessibility and travel efficiency, particularly by reducing traffic congestion on the city's main western corridors. This new road will directly connect Jalan Raya Menganti with Jalan Tambak Oso Wilangun. Previously, the route from Jalan Raya Menganti to Jalan Tambak Oso Wilangun required passing through multiple congested urban roads with a total distance of 16.8 km. With the development of JLLB, the new route will be shortened to just 10.1 km, providing faster travel time, smoother traffic flow, and greater economic connectivity in West Surabaya.

Key Investment Highlight

Location

Surabaya, East Java Province

Total Area/Land Status

10,1 Km

Business Scheme

KPBU/PPP

Est. Investment Value

IDR 1,5 T

Project Owner

IDR 1,5 T

Financial Feasibility

IRR : 6,44%
BCR : 1,39
NPV : IDR 681,24 B

This new project included in the Presentation Book and has not yet been profiled by banks.
